

1.1.3. Area of Square

Algorithm:

Step 1: Start.

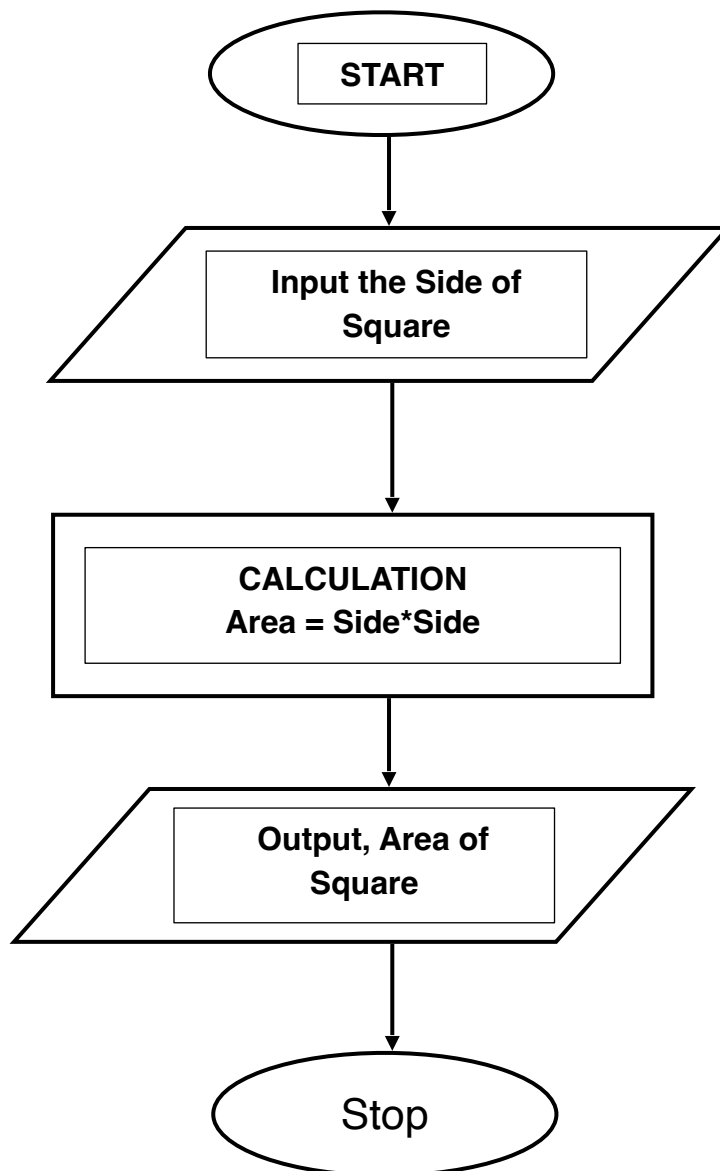

Step 2: Input the side of the square.

Step 3: Calculate area using formula: $\text{area} = \text{side} \times \text{side}$

Step 4: Display the area of the square.

Step 5: Stop.

1.1.3. Calculate Area of the Square

02:29

Write a Python program that prompts the user to enter the *side_length* of a square and computes the area of the square.

Formula:

- Area = side_length^2

Input Format:

- The input is a positive integer value that represents the *side_length* of the square.

Output Format:

- The output is a positive integer value that represents the area of the square.

Sample Test Cases
