

1.1.2. Area of Rectangle

Algorithm:

Step 1: Start .

Step 2: Input the length of the rectangle.

Step 3: Input the breadth of the rectangle.

Step 4: Calculate area using formula:

$\text{area} = \text{length} \times \text{breadth}$

Step 5: Display the area of the rectangle.

Step 6: Stop .

1.1.2. Area of Rectangle

03:03

AA

Write a Python program to calculate the area of a rectangle given its length and width.

Formula:
Area of Rectangle = Length × Width

Input Format:

- First line contains a float value representing the length of the rectangle
- Second line contains a float value representing the width of the rectangle

Output Format:

- Print the area of the rectangle as a float value formatted to 2 decimal places.

Sample Test Cases

areaOfRe...

Submit

11 = float(input())
2 w = float(input())
3 a=l*w
4 print(f"{a:.2f}")
